SUMMARY

Final-year AI-focused Software Engineering student with a strong foundation in Data Structures & Algorithms, Object-Oriented Programming, and full-stack backend development. Experienced in building production-ready REST APIs, LLM-powered automation pipelines, RAG systems, and data workflows using Python, Fast-API, PostgreSQL, and Lang-Graph, with fintech data-analyst internship experience. Strong interest in AI/ML, automation, and scalable software systems.

EDUCATION

Parul University, Vadodara, Gujarat 2023 – Present
B.Tech in Computer Science (AI Specialization) CGPA: 8.1

Prasad Public School, Mathura, Uttar Pradesh 2021 – 2023
Senior Secondary – 12th 84%

PDDSVM, Mathura, Uttar Pradesh 2019 – 2021
Higher Secondary – 10th 91%

TECHNICAL SKILLS

Languages: Python, Java, C, SQL
Backend & APIs: Fast-API, Flask, REST APIs, SQL-Alchemy, Pydantic, Playwright
AI & LLM: Lang-Graph, LangChain, OpenAI API, RAG, FAISS, Embeddings, Instructor, Agentic AI, Prompt Engineering
Machine Learning: Scikit-learn, TensorFlow, OpenCV, CNN, Deep Learning, Feature Engineering, Model Evaluation
Data & Databases: PostgreSQL, MySQL, Pandas, NumPy, ETL, Excel
Visualization & Cloud: Power BI, Tableau, Plotly, Matplotlib, AWS
Tools & Practices: Git, GitHub, Docker, VS Code, Jupyter Notebook, Google Colab, Code Review
CS Fundamentals: Data Structures, Algorithms, OOP, SDLC, Version Control

PROJECTS

AI-Powered B2B Intent Enrichment Pipeline | Python, Fast-API, Lang-Graph, PostgreSQL, OpenAI API Jul – Aug 2026

- Pioneered a production-grade B2B intent enrichment pipeline that asynchronously collected company intelligence from 500+ news portals, financial filings, and hiring platforms, cutting manual research effort by ~70%.
- Orchestrated a Lang-Graph multi-agent workflow across Research, Analysis, Scoring, and Recommendation stages using Instructor and Pydantic, improving lead-qualification accuracy by ~40%.
- Implemented Fast-API microservices with PostgreSQL and SQL-Alchemy with retry mechanisms for reliable intent scoring, supporting 1,000+ leads processed daily with ~30% fewer pipeline failures.

Full RAG Pipeline: Document-Based Question Answering | Python, LangChain, Hugging Face, FAISS 2026

- Built an end-to-end Retrieval-Augmented Generation pipeline with a custom loader ingesting PDF, DOCX, and TXT files and skipping unsupported formats gracefully.
- Tuned chunking (500-character chunks, 100 overlap), generated all-MiniLM-L6-v2 embeddings, and indexed them in FAISS with duplicate-chunk removal to improve retrieval quality.
- Implemented top-k retrieval feeding a Hugging Face QA model, returning each answer with its source passages for traceability.

E-Commerce Business Intelligence System | Fast-API, PostgreSQL, Power BI, Machine Learning Jan 2026 – Mar 2026

- Established an end-to-end BI framework for sales analytics, segmentation, and revenue forecasting using Fast-API, PostgreSQL, and ETL pipelines processing 50K+ transaction records.
- Applied RFM Analysis, K-Means Clustering, and Prophet Forecasting, improving customer-segmentation accuracy by ~30% and forecast reliability by ~25%.
- Created executive dashboards using Power BI, Tableau, and Plotly, boosting KPI visibility and stakeholder adoption by ~35%.

EXPERIENCE

Bharat Space Education Research Centre (BSERC) – Def-Space Tech Intern (Online) 24 Oct 2026 – Present

- Enrolled in the Gen AI and AI Agent Internship under the Def-Space Education and Innovation programme, an online, hands-on programme covering LLMs, RAG, vector databases, and prompt engineering.
- Practising AI agent workflows (plan, act, check), automation, and API integration through live sessions and assignments.

BlueStock Fintech – Data Analyst Intern 24 Jul 2026 – 24 Sep 2026

- Streamlined data-quality pipelines integrating REST APIs and heterogeneous data sources, processing 10,000+ records daily.
- Reduced manual reporting effort by approximately 80% by building automated validation checks and anomaly detection.

CERTIFICATIONS & ACHIEVEMENTS

- Oracle Certified Foundations Associate (2025)
- AWS Academy Graduate & AWS Cloud Practitioner (2025)
- Google AI Essentials (2026)
- TCS iON NQT: 79.98% | Cognitive, Verbal, Reasoning & Programming Assessment (C, Python)
- Participant – PU Code Hackathon (2026)
